O.I.E. list "C" diseases:
These are the local diseases which are not communicable but are of Socioeconomic and/or public health importance within localities e.g. Black Quarter, Enterotoxaemia, Actinomycosis, Botulism, BVD, Coccidiosis, Liverfluke, Listeriosis.

DISEASE REPORTING SYSTEM:
Maharashtra State has a very effective reporting system existing for reporting of O.I.E. list "A", list "B" and list "C" diseases. The disease outbreak reports and the epidemiological information are sent by Livestock Development Officer (Extension) of Panchayat Samiti to the District Animal Husbandry Officer and District Deputy Director of Animal Husbandry of respective district. A monthly outbreak report of O.I.E. list "A" diseases is prepared by District Deputy Director which is submitted to Disease Investigation Section, Pune. This office scrutinises, compiles and analyses the data and then prepares and sends higher authorities.

1. Village/Root level
The information of any disease occurrence at the village is given to the Livestock development Officer/LSS by either the Livestock owner/Sarpanch/Police Patil who then visit the outbreak, takes the decision regarding tentative Diagnosis and the report is submitted to the Livestock development Officer (Extension) at Taluka level.

2. Taluka/Block level
Livestock development Officer (Extension) at Taluka level collects the relevant information about the outbreak and then he sends these reports (EDR) immediately to the District level.

3. District level
The epizootic disease report (EDR) sent by Block/Taluka Veterinary Unit are collected by the District Deputy Commissioner of Animal Husbandry, DAHO, Assistant Commissioner of Animal Husbandry, Veterinary polyclinic of the respective district. Monthly disease outbreak reports are submitted to Regional Joint Commissioner of Animal Husbandry.

4. Regional level:
Monthly disease outbreak reports for the region is submitted to Commissioner Animal Husbandry, Maharashtra State, Pune-1 and Disease Investigation Section, Aundh, Pune-7 which is State level Laboratory of Maharashtra State.

5. State level:
This level includes the office of the Commissioner Animal Husbandry, Maharashtra State and Disease Investigation Section, Aundh, Pune-7.
Contagious disease report for list A, B, & C is compiled by the Statistical Wing of Commissioner Animal Husbandry and the Monthly of Contagious disease outbreak report submitted to the National Level at New Delhi every month. The OIE List “A” diseases monthly outbreak report is compiles by the Disease Surveillance Unit of Disease Investigation Section, Pune and submitted to Commissioner Animal Husbandry, Maharashtra State, Pune-1 and the report is then send to National level at New Delhi through Secretary, Animal Husbandry Department, Government of Maharashtra.

6. National Level
The Department of Animal Husbandry, Ministry of Agriculture, Govt. of India, New Delhi collects and compiles the Monthly report of all the States and the monthly consolidated information is submitted to O.I.E., Paris.

7. International level:
The OIE is the world Institute which is looking after all Animal epizootics in the world. The correct and up to date information of all Animal diseases which are reported all over the world is available in this Institute and it is used for deciding the international export policies.

Advantages of disease reporting:
The correct and quick reporting of all diseases from the field staff forms the foundation for disease control activities and benefits Animal and simultaneously improves the economical status of the country. There are many advantages of disease reporting -
✓ The first and foremost is that, quick reports facilitate to confirm the disease earlier and thus the control measures can be adopted earlier.
✓ It will also help in building of epidemiological database which is useful in demarcation of endemic zones and further vaccination etc.
✓ The epidemiological database is further useful in disease forecasting systems.
✓ The reporting of economical losses is very useful in detecting most important disease over that period and for taking the policy decision for prevention.
✓ The correct and quick reporting will form a foundation for disease free zones and the further eradication of the disease.

Maharashtra State is having good infrastructure of reporting system, good Diagnostic facilities such as Regional Disease Diagnostic Reference Laboratory (WRDDL) started at Disease Investigation Section, Pune and dedicated field Veterinarians.

DISEASE FORECAST

For Disease Forecasting, huge volume of data is required as –

- Livestock Disease profile
  - Month wise Outbreaks
  - Disease wise Outbreaks
  - Species wise Outbreaks
  - District wise Outbreaks
  (Including number of Outbreaks, Attacks, Deaths & Vaccinations)

- Livestock Population profile
  - Species wise Population
    (Five major Species- Cattle, Buffalo, Sheep, Goat & Pig)
  - District wise Population

- Meteorological profile
  - Station wise Temperature
  - Station wise Rainfall
  - Station wise Humidity

From all districts of Maharashtra State Animal disease outbreak monthly reports were received to Disease Investigation Section, Pune-7. As per the data available on disease outbreaks reported since last Ten years of all districts of Maharashtra State, it is observed that the specific disease were reported in specific month in particular area of Maharashtra State.

On the basis of month wise, district wise and disease wise disease outbreak information for last five years, the disease Forecast for various diseases is worked out.
